

CLARVON
CLEAN AIR. VERIFIED.

VERIS QUICK START

See it. Understand it. Trust it.

1 SET UP TRIPOD

Spread all three legs fully on a flat, level surface.

2 MOUNT CASE

Align the case with the tripod mount and lock it in place.

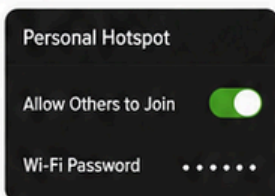

3 CONNECT POWER

Connect the power bank to the Veris unit using the USB cable.

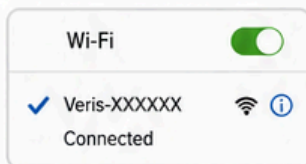

4 TURN ON HOTSPOT

Turn on your mobile hotspot on your company phone.

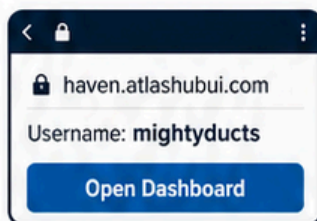

5 CONNECT VERIS

On your phone, connect to the Veris network from Wi-Fi settings.

6 OPEN DASHBOARD

Open your browser and go to haven.atlashubui.com. Log in with username: **mightyducts**.

7 START JOB

Enter customer details, confirm technician name, then select **Start / Update Job**.

Customer Details

Technician: John Smith

8 ADD ROOMS

Add the room(s) or area you will be measuring.

Rooms

Living Room

Main Level

Bedroom 1

[+ Add Room](#)

9 CAPTURE BEFORE

Place Veris in the center of the room. Let readings stabilize, then tap **Capture Before**.

Before

Capture Before

10 PERFORM SERVICE

Perform the normal duct cleaning service for the area.

11 CAPTURE AFTER

Allow system to run 20–30 minutes where applicable. Place Veris in the same location, then tap **Capture After**.

After

Capture After

12 FINALIZE REPORT

Review the summary and finalize the report.

Job Complete

Review the summary and finalize the report.

Finalize Report

TIPS FOR SUCCESS

- Keep Veris in the location of interest.
- Keep air inlets open.
- Avoid placing Veris near vents.
- Keep the area locked out before & after.
